**AQUACULTURE**

Direct from Manufacturer | Made in Latvia (EU)

Baltic Ropes brings you high-performance mooring and fishing solutions  
Magistr and MFG factories produce wide rope range of different materials used in  
marine, fishing, aquaculture, agriculture and construction industries.

MFG factory is a full-cycle manufacturer with in-house extrusion lines, ensuring  
quality control from granulate to finished rope.

## Our products:

### Crab Lines

Polysteel 3-strand main line with spliced tails for crab  
pot installation.  
We offer splicing of tails of any lengths at any  
requested distance on the rope.  
Crab line length is up to 5000m. Packed in boxes or big  
bags for easy transportation and handling.

**Most common diameters 20mm, 22mm**

### Polysteel twisted ropes

#### 3-strand & 4-strand twisted

Available in diameters from 6mm to 44mm  
and normal, hard, soft or super soft lay.  
Pre-stretched option is possible.

**Main properties:** specific weight - 0,93 g/cm<sup>3</sup> (floating)  
melting temperature - 150C  
do not absorb water  
resistant to chemicals

### Floated ropes

Polysteel double braided ropes with floats inside.  
Different float sizes and types are available upon  
buoyancy request.  
Possible with HMPE core for extreme conditions.

### Lead ropes

Twisted and braided lead ropes  
made of Polysteel or Polyester.  
Meter weight is adjusted according to  
customer's specification.

### Nylon Fishing twines

Fishing twines are made of high tenacity Nylon yarn and  
are mainly used in fishery for nets and fishing gear.  
Available constructions: **210/4 to 210/480**

**Main properties:** standard package: 1,7 kg – 11 kg  
winding type: precision winding

### Nylon 16-strand braided twines

Used in production of fishing nets.  
Different sizes available:  
from **30 m/kg** up to **280 m/kg**

### MagForce (HMPE 12-strand braided ropes)

Available in diameters from 2mm to 48mm.  
Different coating types are offered depending on application environment.

**Main properties:** specific weight - 0,98 g/cm<sup>3</sup> (floating)  
melting temperature - 147C  
UV-resistant  
good resistance to chemicals
